

Landstede

in the Netherlands

UTRECHT - ZWOLLE

Current:

Matthijs Brouwer

Maud van den Eijnden

Karin Messelink-Korterink

Former members:

Anne Khaled

Loes Karsten

Marloes van der Meer

Introducing

Three Teams:

- All teachers from Landstede, some in training
- One facilitator per team, experienced colleague

How:

- Hybrid: 7-8 live meetings + MS Teams

Focus:

- teacher training (certification)
- CPD
- boundary crossing (much appreciated by participants)

Adaptions

- Emphasis on facilitator guiding sessions
- Working in digital environment they already know (MS Teams)
- Dissemination partly through efforts from research group

The biggest Success

- Enthusiasm
- Integration in teacher certification next year

What can be improved?

1. More guidance in coming to research questions
 - boundary crossing is difficult
 - abstracting from common themes is difficult
2. Make the whole journey and learning experience more explicit
 - much was learned by collaborating
 - the journey was much bigger than the LS itself
3. Planning and logistics need attention
 - although part of module 1, it was difficult to plan meetings
4. Train the facilitators
 - They can share experiences and success of LS4VET
 - They can help further develop the program
5. More attention and integration of the expert and the professional practice
